

TOILET CUBICLES & WASHROOMS

At Laminform we manufacture decorative laminate components using a variety of types of board, forming them if required to produce particular shapes. Established in 1988 our core business is the supply of laminated toilet cubicles, vanity units and duct panels to provide washrooms but we also supply many other types of laminated components, manufactured under our ISO9001 quality system. We will work with you to create a product to meet your design specification or you can select from our standard range. Whichever you choose we will use our skills and expertise to provide you with a practical and cost effective solution to meet your requirements.

Our Products & Services

- Toilet & Changing Cubicles
- Vanity Units
- Duct Panelling
- Wall Linings (Fire Retardant/Water Resistant)

Essentials Surrounded With Style For Our Customers

EDUCATION

The successful manufacture and installation on time and to budget of a washroom package of cubicles, accessible duct paneling and vanity units for Freebrough Community College in Brotton, Cleveland. This HBG Construction development provides benefits to the community through its new sports facilities.

SPORTS & LEISURE

On time and ready for Christmas and the New Year meeting with Bolton Wanderers in the FA Cup, we were pleased to be associated with Carillion Regional Building on the fit out of the newly constructed Lakeside Stadium for Doncaster Rovers FC.

COMMERCIAL

Locally we supplied washroom systems incorporating toilet cubicles, vanity units and IPS ducts for the imposing Gateshead International Business Centre, built and fitted out by Surgo Construction.

Our remit was to manufacture and install cubicles, access ducts and vanity units for all areas, a task which gave us the opportunity to supply the full range of products from Moisture Resistant MFC through Formica HPL in post formed, PVC lipped and Compact Grade formats. Vanity units were a mixture of HPL and Solid Surface styles. This council driven development will provide a huge boost to the community with its athletics, all weather and five a side football and hockey facilities.

We were pleased to be preferred washroom subcontractor for four new Cleveland Police Authority facilities. These developments at Redcar, Kirkleatham, Southbank and Middlesbrough were won against stiff opposition and allowed us to build further on our relationship with Laing O'Rourke Northern through this package.

HEALTH

Successful completion and handover of the St. Georges Park Mental Health Unit at Morpeth in Northumberland. This Robertson Construction NEE Ltd. development covers 5 sectors providing care and treatment of stroke victims and the mentally ill and creating an environment for rehabilitation into the community.

Another noteworthy contract was the fit out of the new Robin Hood Airport at Doncaster where our brief was to provide high quality washroom facilities throughout and low maintenance laminated wall lining panels for passenger circulation areas.

Our brief was to manufacture and install a wide range of secure duct access panel enclosures to accommodate a range of specialist sanitary ware and equipment, coupled with standard and specialist WC cubicles and vanity units.

Have you got essentials you'd like surrounded in style? Whether it's a refurbishment or new build, we would welcome the opportunity to discuss your requirements with you and would be pleased to provide you with a quotation for a practical and cost effective solution to meet your needs.
